

10 Gigabit Fiber Optic Router Tester

Overview

The EX10 helps onsite technicians easily validate bandwidth speeds up to full line rate 10 Gigabit Ethernet (including GPON, XGS-PON) and test residential WiFi 6E to monitor residential quality of experience (QoE). The EX10 is the first device to include all cutting-edge multigigabit interfaces in. The LinkRunner 10G is a portable Ethernet tester for multi-gig and 10 Gig networks (copper and fiber) that simplifies validation and configuration, plus streamlines workflows by combining essential functions into a single, portable, ruggedized unit. Install, test, verify, and troubleshoot. The SignalTEK QT Pro is the ultimate all-in-one tester for copper, fiber, and Wi-Fi networks. The EX10 provides both wire-line and wireless testing capability, providing comprehensive insights that field technicians can use to remedy any situation. Operators can prove they deliver both promised throughput and unparalleled quality of experience at the customer premises.
