

24-core ODF optical cable splicing

Overview

24 cores ODF ATT-ODF-24 provides efficient cable connections between outside plant cables and equipment inside the buildings and communications facilities. They can manage both bundle type and ribbon. It acts as a distribution point for fiber-optic cables in a central office, data center, or other communication. An Optical Distribution Frame (ODF) is a specialized enclosure designed to manage, connect, protect, and distribute fiber optic cables in telecom and data networks. Think of it as a centralized hub where fibers are terminated, spliced, patched, and routed—ensuring every connection is organized.
