

48-core lc type fiber optic distribution frame

Overview

ODF 48 Core is a high-density fiber optic distribution frame designed to meet the ever-increasing demands of today's network systems. This product is ideal for data centers, server rooms, and other communication distribution systems where space is limited. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. ODF with pigtails and adapters contain one. A 48-core ODF LC (Optical Distribution Frame with LC connectors) is a critical infrastructure component in modern fiber optic networks, designed to manage, protect, and distribute high-density fiber connections. These units play a pivotal role in ensuring signal integrity, simplifying maintenance. We offer optical distribution frame in different size, such as 12 core, 24 core, 48 core, 72 core, 96 core, 144 core, SC, FC, LC adapter options are available.
