

850nm optical module 10g single fiber

Overview

This FiberHTT HSP85192-SR 10G SFP+ Duplex MM 850 300m DDM transceiver is designed to transmit and receive optical data over single mode optical fiber for link length 300m. REACH is a European Union regulation concerning the Registration, Evaluation, Authorization and Restriction of Chemicals. The regulation aims to protect human health and. Leveraging VCSEL (Vertical-Cavity Surface-Emitting Laser) technology, 850nm modules offer low power consumption, high compatibility, and strong performance for distances up to several hundred meters. Why Choose the 850nm Wavelength?

Industry Standard: IEEE 802. It is ideally suited for 10 GbE datacom (belly-to-belly for high density applications) and storage area network (SAN/NAS) applications based on the IEEE 802. An optical transceiver module consists of. The SFP+ (Enhanced Small Form-Factor Pluggable) is a compact, hot-pluggable module that supports serial data transmission at 10Gbps, converting electrical signals to optical and vice versa.
