It sells international transmission capacity through submarine fiber optic cables and IP Transit and manages IXP Angonix in Luanda, Angola and the AngoNAP data center in Fortaleza, Brazil (Tier 3). Built in 2009 by the five major Angolan telecom operators, the company is driven by the Angolan government's vision of transforming Angola into a communications hub. The company's core. Angola has invested strategically to become an alternative hub for the southern and central region of Africa building datacenters, satellite construction, and optic fibers projects to connect the country internally, to the continent and the world. Our plants offer large capacities with lower lead time, thanks to our latest-generation equipment and machinery. All our products are manufactured and tested using the latest-generation machines, which are designed for automation.
