

# Azerbaijan Telecom Broadband Fiber Optic Cable Model

## Overview

Azerbaijan is connected to the Trans-Asia-Europe (TAE) fiber-optic cable, providing international connectivity to the rest of the world. The “Azerbaijan Diary” program highlighted that, as a key component of the Digital Silk Way initiative, the project envisions the first fiber-optic. Another phase of the construction of the Trans-Caspian Fiber Optic Cable Line, a key component of the Digital Silk Way project aimed at creating a digital corridor between Europe and Asia through Azerbaijan, has begun. AzerTelecom. Azerbaijan's telephone system is a combination of old Soviet era technology used by Azerbaijani citizens and small- to medium-size commercial establishments, and modern cellular telephones used by an increasing middle class, large commercial ventures, international companies, and most government. The company has a sustainable and diversified fiber optic cable network covering all major regions and cities in Azerbaijan and connected to global network, including all major international telecommunication hubs through its partners' networks abroad. The company has a significant market share in.
