

Belgian-branded DAC high-speed cable 10G

Overview

The AMG SFP-DAC-10G series are industrial high speed Direct Attach Cables (DAC) offering transmission of 1Gb or 10Gb Ethernet data using passive Twinax cable technology over distances from 0. The SFP10GAC10M is an MSA-compliant SFP+ copper direct attach cable specifically designed, programmed, and tested for operation in 10G network implementations. It provides reliable 10 GbE connectivity over copper cables, making it a cost-effective alternative to fiber optic cables. With the features of the low cost, low power consumption and low latency, it is an alternative to optical transceivers for short reach links in high-speed interconnect applications such as Data Center, HPC and enterprise network. The 10G SFP+ Passive Direct Attach Copper Twinax Cable offers a cost-effective connectivity for establishing a 10-Gigabit short-distance connectivity within a rack or between adjacent racks in data centres. Designed. 10Gtek's automatic assembly line, assures the consistency of manufacture under the process of laser cutting, aluminum shielding stripping, isolator stripping, automatic reshaping, automatic soldering and ultraviolet ray curing. The modules are compatible with most 1000BASE-X SFP ports and 10GBASE-R SFP+.
