

# Box-type 1-to-2 fiber optic splitter

## Overview

The 1×2 ABS box module type PLC Splitters have high performance in terms of low insertion loss, low PDL, high return loss, and excellent uniformity over a wide wavelength range from 1260nm to 1650nm and working in temperatures from -40°C to +80°C. FS PLC Fiber Optic Splitters, Bare/Blockless/ABS/LGX Splitter/Rack Mount Types, support 1xN light distribution, with low IL and PDL for high-reliability transmission. Deploying compact FS PLC Splitters to simplify your networks, perfectly fits your PON, EPON, FTTX, etc. A fiber optic splitter, also known as an optical splitter or a beam splitter, is a passive optical device that can split a single optical signal into two or more separate output signals. Ideal for singlemode fiber networks. T PON standards such as GPON, XGS-PON and new 25 and 50G standards. Unlike active devices (which require power), splitters operate without electricity, relying solely on the physics of.
