

CE Certified Standalone Switch 40G

Overview

CP6940 is a fully managed layer 2 and 3 1/10/40 Gigabit Ethernet switch for CompactPCI® and VME embedded systems. It is designed for long-term programs and use in harsh environments and in an extended temperature range from -40°C to +70°C. Shop managed and unmanaged options. Cisco® Catalyst® 9200 Series switches extend the power of intent-based networking and Catalyst 9000 hardware and software innovation to a broader set of deployments. It is ideally suited for multi-CPU high-performance servers. Class-leading NETGEAR® AV network switches are designed to make integration with Crestron AV-over-IP products as simple as possible. All of the SFP ports enable. The Dell EMC Networking S4048-ON switch empowers organizations to deploy workloads and applications designed for the open networking era. Businesses who have made the transition away from monolithic proprietary mainframe systems to industry standard server platforms can now enjoy even greater. Next-generation high-density Gigabit Ethernet switches, providing 40/100GE uplink ports. Supports stacking, allowing multiple member switches to work in.
