

# Cable trays can be surface-mounted

## Overview

**Surface-Mounted Fixing:** For floor-level installations, cable trays can be mounted directly onto surfaces using brackets or clips. Cable trays are a popular choice in cable management systems because of their strength and ability to handle large cables. When it comes to fixing and mounting cable trays, these methods should be considered:

**Suspended Mounting with Rods:** This method uses threaded rods to suspend the cable tray. When completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. It is designed for. The cable support lengths and fittings can basically be designed as cable trays, cable ladders or mesh cable trays, in which cables are routed. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. Our most popular products based on sales.
