

# Canadian Data Center Energy Company

## Overview

IDC Power Corp delivers scalable, off-grid natural gas power systems for AI clusters, crypto mining, and internet infrastructure. Based in Alberta and serving North America. Toronto-based data storage and cloud company, ThinkOn, is the only Canadian company that meets the federal government's security requirements to house federal servers and to upload federal data into a cloud the company owns and operates. "We need to foster more domestic competitors as opposed to. At IDC Power Corp, we deliver scalable, environmentally responsible power generation using Alberta's abundant natural gas. From hyperscale AI data centers to decentralized crypto operations, our energy solutions are built for the future of computing. The Independent Electricity System Operator (IESO) forecasts that by 2050, energy use from commercial data centers could rise by over 400% compared to today, and this mirrors global trends.
