

Columbia fiber optic distribution box

Overview

This optical fiber distribution box integrates essential functions—splicing, splitting, storage, distribution, and routing—into one wall-mountable unit. Its modular, user-friendly design simplifies network expansion while delivering superior durability and long-term reliability. Integrate FTTX activities into a small and compact wall mount enclosure, providing a safe space to splice, split, distribute, store, and cross-connect fiber optic. Mexfoserv® has a large variety of models available to fit our customers' needs and specifications, ranging from size, amount of ports. The fiber distribution box, a crucial component in optical fiber networks, serves a dual purpose of managing and protecting optical fibers while facilitating their efficient distribution. To ensure consistent performance and longevity, it is essential to adhere to strict technical specifications.
