

Czech Coherent Optical Module 100G

Overview

The 100G ZR QSFP28-DCO pluggable transceiver supports up to 80km (un-amplified) and up to 300km (amplified) WDM networks. It is fully compliant to the IEEE 802.3™-2022 100GBASE-ZR standard, ensuring interoperability with other solutions. And the built-in digital diagnostics monitoring (DDM) allow. Moving 100 gigabits — or 400, or 800 — over a single fiber strand across hundreds of kilometers requires more than just a fast laser. It requires coherent optics: a transmission technology that encodes data not just in the intensity of light, but in its phase and polarization as well. Coherent grey optic options are available for the DWDM network. Ciena's WaveLogic 6 Extreme 1.6T quantum-safe encryption solution on the Waveserver platform was designed with this in mind, supporting QKD system interworking and NIST-certified PQC algorithms. (NYSE: COHR), a global leader in photonics, announces the industry's first QSFP28 Dual Laser 100G ZR solution that enables broadband providers to efficiently maximize capacity on existing fiber infrastructure. The Cisco QSFP28 100G ZR module expands the portfolio of digital coherent optics (DCO) modules to connect QSFP28.
