

# Demand for optical modules explodes

## Overview

The demand for optical modules surged this year (2026), primarily driven by the explosive growth of AI computing clusters, bandwidth upgrades, the shift from copper to fiber optic networks, and increased capital expenditure by cloud providers. Optical Module and DCI by Application (Communication Service Provider, Internet Content and Carrier Neutral Provider, Government/Research and Education, Other), by Types (Optical Transport Network, Data Center Core Network, WAN), by North America (United States, Canada, Mexico), by South America. Shares of optical module makers InnoLight and Eoptolink surged over 6% to new highs as 1.6T products enter commercial mass production. The global optical module market is forecast to grow 60% in 2026 and reach nearly \$60 billion by 2031, driven by AI demand. This transformed them from "optional components" into. Data centers will keep dominating optical module demand as AI and cloud drive revenue growth through 2030. With global R&D projected to. The Optical Modules Market encompasses the design, manufacturing, and deployment of compact, high-performance devices that facilitate the transmission and reception of optical signals over fiber optic networks. 5 billion in 2023 to an estimated USD 10. Key growth factors include the surging demand for high-speed data transfer, the escalating.
