Distribution board

Overview Theatre lighting North America United Kingdom Manufacturer differences Location and designation

In a theatre, a specialty panel known as a dimmer rack is used to feed stage lighting instruments. A U.S. style dimmer rack has a 208Y/120 volt 3-phase feed. Instead of just circuit breakers, the rack has a solid state electronic dimmer with its own circuit breaker for each stage circuit. This is known as a dimmer-per-circuit arrangement. The dimmers are equally divided across the three incoming phases. In a 96 dimmer rack, there are 32 dimmers on phase A, 32 dimmers on phase B, and 32 on phase C to sprea

What does a distribution box do?

Distribution box is a device for configuring, monitoring and protecting the power system. It is often placed in buildings, factories and even
