

El Salvador Temporary Power Distribution Box Plant

Overview

This complex project includes a 380-megawatt combined cycle power plant, a floating storage and regasification unit (FSRU), marine infrastructure (including an underwater pipeline), and a 27-mile transmission line. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisión Hidroeléctrica del Río Lempa), the rest of the generation capacity is in private hands. 4 gigawatts (GW) across 16 power plants. The country's energy landscape reflects ongoing efforts to modernize and expand its infrastructure, while also. Energía del Pacífico (EDP), one of Invenenergy's most ambitious projects, began construction in 2020, during the height of the COVID-19 pandemic. 6 million customers, covering 80% of El. In 2024, El Salvador's power distribution unit import market saw a shift in concentration from high to moderate, indicating a more diversified import market. The top exporting countries - Mexico, USA, China, Germany, and Costa Rica - continue to play a significant role in supplying these products.
