

Extension of Dedicated Fiber Optic Cable

Overview

Yes, fibre optic cables can be extended by using splice closures or optical connectors to join multiple cables together. This allows for longer distances to be covered without loss of signal quality. Fiber optic. If you get your hands on a Pre-terminated Fiber Optic Assembly and a couple of Media Converters, you're only a few steps away from extending your small wifi network more than 250 feet. Check out the summary of what we're about to explain below. Maintain signal quality for home theater, gaming, and more. Some extensions are simple and perfectly reasonable for a careful DIY job. The fiber optic cable also will not pick up the surge in the environment and lead back to the IP. The FFO allows you to re-position an existing hub or router to up to 30m within your home, providing added flexibility and better wi-fi coverage within your property.
