Typical Spiral Element. Our MYLAR®/NOMEX® epoxy hoses not only provide the optimum means to waterproof and electrically insulate pipes but also are successful in other applications, such as when securing electromagnets to the engine. The heat-shrink material ensures a close bond between the magnets and the epoxy layer. INFRAPIPE is a New Zealand made spiral wound HDPE pipe system that is very light, very strong, with a 100 year design life and completely recyclable. Using the globally accepted KRAH technology, INFRAPIPE is made with stiffness ratings from SN2-SN100+ under the AS/NZS 5065:2005 standard. Diameters. ♦♦♦Egg Rockets' and making our body tubes from scratch. When I've made 1" (OD) rockets in the past, we would cut the gummed paper at a 45-degree angle to align the wrap at the end f the body tube to then start our "candy cane" wrap. Now we are making larger rockets and using 3" gumme tape with. High Separation Efficiency: Based on different membrane materials and pore - size designs, it efficiently separates various substances.
