

Fiber optic broadband cannot be connected to a router

Overview

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly. When your fiber optic network stops working, begin with a structured approach. Many fiber internet problems come from dirty connectors or loose plugs, not major faults. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Whether you have an ONT, a modem, or a gateway, you can apply these A-B-C steps when you can't get online. Let's start with A: the basics. Take care of the basics These are the basic things you should do first, in the order below or in whichever way that's convenient.
