

Fiber optic cable run on the rooftop

Overview

Yes, you can run electrical cable through the roof, but it must be done with caution and in accordance with local building codes. Ensure that the cable you choose is rated for outdoor use and can withstand exposure to the elements. Whether you're installing new internet service, setting up a satellite dish, or managing an intricate home theater system, understanding how to properly and safely pass cable. Running fiber optic cable above ground is a viable option for many telecommunications and data transmission projects. NBN guy came out to install fibre but said i need to provide space in the roof space for him to work due to the current conduit from the node being in an. HOWEVER. my existing copper cable from my house to the telegraph pole runs through my neighbours roof space. Fiber in a duct solutions have a major aesthetic. 99% of my work is cat5E data, in interior retail environment. (rarely have to run exterior circuits) But on occasion have used 1 -1/2 EMT on rooftop conduit supports to run between structures. Have a customer interested in connecting structures 20 feet apart with a fiber circuit, but doesn't want.
