

HP Fiber Optic Switch Default Management IP

Overview

However, you first need to access the Web interface using the switch's default IP address. The value ntp1 is the IP address or DNS name of the first NTP server, which the switch must be able to access. To manually configure an address, make sure the DHCP Enabled box is unchecked, then change the switch's default settings (IP address. These passwords are required for all update operations to be performed on the switch, Setting switch admin passwords prevents unauthorized users from performing these operations. • On the HBA & Switch Management menu, click Set Switch Admin Password. and then on the shortcut menu, click Set. Page 1 HP StorageWorks SN6000 Fibre Channel Switch Installation and Reference Guide This guide describes the HP StorageWorks SN6000 Fibre Channel Switch features and capabilities, planning considerations, installation, diagnostics, and troubleshooting.
