

How to connect the cable ends of indoor fiber optic cables

Overview

In this guide, we'll walk you through the entire process of preparing fiber optic cable for splicing and termination to fiber connectors. We'll explore the necessary tools, safety precautions, and step-by-step procedures for cable connectors, mechanical and fusion splicing. Proper connection of fiber optic cables is essential to harness these benefits fully, as even minor errors can lead to significant performance issues like signal loss. Strip and Clean Fiber Ends Using a fiber optic stripper, remove any outer cable jacketing to expose the interior glass. We terminate fiber optic cable two ways - with connectors that can mate two fibers to create a temporary joint and/or connect the fiber to a piece of network gear or with splices which create a permanent joint between the two fibers. more Audio tracks for some languages were automatically generated.
