

Huawei Fiber Optic Layer 3 Switch

Overview

The Huawei eKitEngine S530-48S4XE Switch is a high-performance Layer 3 managed switch designed for enterprise campus networks, aggregation layers, and high-density fiber deployments. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. The Huawei S530-48S4XE is a high-density Layer 3 enterprise switch with 48 SFP ports, 10GE uplinks, and stacking capability for campus and aggregation networks. In a world where every millisecond counts, this hardware is the unsung architect behind everything from lag-free 4K streaming to real-time stock trades. For businesses needing to switch to networks that won't buckle under. A Layer 3 switch from Huawei combines the functionality of a traditional network switch with that of a router, enabling it to forward data based on both MAC addresses (Layer 2) and IP addresses (Layer 3).
