

# Indoor electrical distribution box housing material

## Overview

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. Each distribution box material has its own special strengths. For example, you may need flame. What is the most common material for distribution boxes?

What makes polycarbonate a good choice for distribution boxes?

What does the IP rating on a distribution box mean?

What material should you use in wet or salty environments?

What is the difference between thermoset and thermoplastic. Electrical enclosures represent more than protective metal housings—they are precisely engineered systems designed to safeguard sensitive electrical components from dust, moisture, thermal stress, and mechanical impact. The right enclosure depends on where it will be installed, what hazards it must resist, which material it uses, and what ratings or certifications are required. Shop our wide selection of indoor electrical enclosures designed for reliable protection in clean, controlled environments. Ideal for housing electrical components, wiring, control panels, and instrumentation, these enclosures are available in various materials and configurations to suit. The distribution box (DB box) helps safely and efficiently distribute electrical power. Today, electrical systems are essential for homes and industries. Electronic enclosures are protective housings designed to contain and safeguard electronic components, assemblies, and systems.

## Article Content

Electrical Enclosures: Types, Ratings, Materials

Quick Answer Electrical enclosures are protective housings used to safeguard electrical components such as breakers, switches, terminals, and

Distribution Boxes: Types and Functions

Learn what an electrical distribution box (DB/distribution board) is, its main components (MCB/RCCB/RCBO, SPD, busbar) and common types.

What Are the Main Materials Used in Distribution Boxes

Distribution box material options include steel, aluminum, PVC, polycarbonate, and SMC, each offering unique benefits for safety and durability.
