

Level 3 Security Protection Core Switch

Overview

The L3 switch is ideal for service provider edge aggregation, enterprise wiring closets, data center aggregation, and network core deployment. DS-3E3700-H Series provide 24 or 48 Giga and 4 fixed 10GE ports onboard with one expansion slot. The high port density satisfy the requirements for hybrid configuration of copper ports and fiber ports at the distribution layer in large sized networks or at the core layer in SMB sized networks. H3C S10500X-G is a high-end Switch series designed for the core layer in intelligent Campuses and Data Centers. Powered by the H3C COMWARE 7 network operating system, the S10500X-G offers a comprehensive set of features tailored to both campus and data center environments, providing a secure and. Use one of the options below to locate your desired product. They provide high performance, resilient stacking, wire speed. The Cisco Business CBS350-48FP-4G Managed Switch delivers enterprise-grade performance tailored for small to medium-sized businesses. With 48 Gigabit Ethernet ports and 4 dedicated 1G SFP uplinks, it ensures seamless high-speed connectivity across your entire network. Designed for full Power over. This document provides reference architectures for configuring networks for small campuses, large campuses, small software-defined (SD) branches, medium SD-branches, and large SD-branches. "Campus" covers a wide range of networks and locations, from multiple floors in an office tower to a.
