

Madagascar Wall-Mounted Wiring Box with 24 Cores

Overview

The WODF can support from 24 up to 288 core splicing by means of independently mounted 24 fibre splice trays each supporting 12-Fibers. Mainly used for FTTH Applications. Large workspace to integrate the cables and pigtails. Top and bottom cable entry plates Twin door with two. To help you choose the right solution for your FTTx deployment, we have categorized our extensive range of Fiber Distribution Boxes (FDB) based on their fiber core capacity and typical application environments. 24 Port Fiber. Durable and Weather-Resistant Design: This outdoor fiber terminal box is designed to withstand extreme temperatures ranging from -35°C to $+55^{\circ}\text{C}$, ensuring reliable performance in harsh environments. It integrates optical fibre splicing, splitting, distribution, storage and cable connection in the wall mounting fiber enclosure. So, Simon offers its customers a wide range of boxes compatible with its different series for wall installation.
