

# Malawi AI joins the server

## Overview

On February 19, 2026, Converged Technology Networks (CTN) announced plans for Malawi's first micro data centre, specifically designed for local AI and cloud services. Recently, I set up and ran an instance of OpenClaw on a local server here in Malawi. From a technical point of view, it was exciting. Micro data centres provide compact, self-contained computing power closer to users, reducing latency, costs, and reliance on foreign. A real-time voice AI that joins Jitsi video calls and has actual conversations. You: "Hello, can you hear me?"

" Enki: "Hello! Nice to hear from you!" You: "What's your name?"

" Enki: "I am Enki, god of wisdom and water. Brian Longwe, co-founder and CEO of CTN. As of April 2026, 22 African governments have published national AI strategies, 21 are drafting, and 49 endorsed the Kigali declaration. The pace of formal policy activity is measurable and documented.
