

Network cabinet equipped with power switch

Overview

The Network Switched PDU provides the capability to securely monitor and control device power through a network connection. These products combine remote configuration and management with power distribution and power/environmental monitoring. These cabinets are widely used in server rooms, network wiring closets, industrial. Belden's XHS Series of Networking and Switch Cabinets is designed to support high load capacities and proper airflow management. What is a Switched PDU?

In addition to Smart PDU. EtherWAN's EasyPoE® Box Series is an integrated solution that combines a managed PoE switch, splice tray, power supply, and a DIN-rail for accessories, all in a single, secure, NEMA-rated cabinet enclosure. Equipped with up to 4 gigabit PoE ports that provide from 15W up to 90W output per port. The Gigaset 42U Floor Standing Network Power Cabinets are equipped with a 3U Power Distribution module to cover all types of power source, two vertical Power Distribution Unit (PDU) and an optional Automatic Transfer Switch (ATS) for connection to secondary power source.
