

North Korea s Fiber Optic KVM Project Scheme

Overview

Internet access is available in North Korea, but is only permitted with special authorization. It is primarily used for government purposes, and by foreigners. The country has some broadband infrastructure, including fiber optic links between major institutions. Online services for most individuals and institutions are provided through a free domestic-only network known as Kwangmyong, wit. Service providers and accessInternet access in North Korea is available from Star Joint Venture Co., a joint venture between the North Korean government's and Thailand-based. As of 2018, construction of an Internet Communication Bureau headquarters was underway in Pyongyang. There are about 30 websites, such as, run by the DPRK government. South Korean Internet users must comply with Trade Laws with North Korea (Article 9 Section 2) in which one needs to have the 's approval to contact North Koreans through their websites.
