You can register multiple extensions to a Yealink DECT Base as accounts. You can then set up handsets to receive incoming calls for all accounts, or only select accounts. You can also choose a default Outbound SIP Account per handset. Outgoing line. Whether the neutral line of each circuit in the distribution box needs to be connected to the neutral block does not depend on the neutral block, but depends on the type of switch in the distribution box. The type of switch here is actually the connection type of the switch. In a specific point. The Distribution box system diagram mainly includes the following parts: Incoming line part: Displays the incoming line source of the distribution box, which may be a single-line incoming line or multiple-line incoming lines (such as normal power supply and backup power supply), and marks the. trial applications. * For different colours and thickness, please r DETAILS
