

Rack-mounted lithium battery cabinet 200kWh for hospital use

Overview

Designed for integration into large-scale energy storage systems, this high-voltage rack offers a dependable 200kWh lithium ion battery capacity built on lithium iron phosphate modules. With no inverter or PCS bundled, it serves as a core battery component, ready for seamless incorporation into. RACK HV PRO is a high-performance embedded LiFePO4 battery module, designed for fast installation and easy maintenance. Each rack provides 200kWh of scalable storage, and multiple racks can be combined to meet larger energy demands. The system uses Lithium. We provide complete solutions for PV power plants and energy storage systems, covering solar PV modules, storage batteries, power conversion systems (PCS), battery management systems (BMS), energy management systems (EMS), and all related electrical equipment. It offers peak shaving, energy backup, demand response, and increased solar ownership capabilities. Featuring advanced safety mechanisms, an intelligent Battery Management System (BMS), and an eco-friendly design, it's the perfect choice for power backup and renewable energy.
