

Sel551 Relay Protection Device

Overview

The SEL-551 Overcurrent Relay and Reclosing Relay provides overcurrent protection and up to four shots of reclosing. It measures phase and neutral currents but not voltages. SEL is announcing a Last-Time Buy (LTB) for the SEL-551. The SEL-551 replaces the many relays, control switches, and wiring. What are common troubleshooting steps for a Sel 551 relay?

All Front-Panel LEDs Dark: Check if input power is present or if the fuse is blown.
Cannot See Characters on Relay LCD Screen: The relay might be de-energized. Check if the ALARM output contact. Below you will find brief information for SEL-501 Relay, SEL-551 Relay, SEL-9918 Package. It covers firmware options and connector options, including. Previously used, professionally repaired, and tested to meet Radwell's performance standards. Unused part repackaged by Radwell after inspection or damaged original packaging. Condition: Required SIGMA Certified Refurbished (Please call (812) 463-2292 for availability).
