

Socket circuit lighting distribution box

Overview

A junction box is used to add a spur or to extend circuits and direct power to lights and additional sockets. Various versions of distribution boxes, a large selection of materials, voltage ranges, rated currents and IP protection types / protection classes for indoor and outdoor use, as well as a wide range of accessories and tools such as WAGO plug-in terminals, crimping tools, cable ties, wire end. The new socket box turns our LED system light into an all-in-one system. It enables you to install additional sockets in different country-specific variants anywhere in the enclosure - in a manner which could hardly be simpler. 2 steel snap-fit mounting clips make securing the lighting distribution box quick and easy, and ensure compliance with IET wiring regulation 521. Every flex7 Lighting Distribution Box is supplied with 2 x steel mounting clips, 2. Equipped or empty socket combinations and fuse box solutions for factories, construction sites, workshops and working environments. Today, ready to use products that are fully equipped with CEE standard industrial type sockets are gaining significance in technical working environments such as. The socket distribution boards and housings are available in exactly the model you need: empty, pre-wired or ready for connection.
