

TCL optical module

Overview

With a power range of 605W to 625W and up to 23.1% efficiency, this module features advanced N-Type TOPCon cell technology, ensuring excellent performance across various environmental conditions. STC: Irradiation 1000 W/m^2 , Cell Temperature 25°C , Air Mass AM1.5. Shingled-cell design helps to manage shade and keep cell temperatures low to produce more power over time. Compare prices for solar products with one click and save. TCL PV modules deliver sustainable energy and significant economic benefits, with high efficiency, a long service life, and stable performance in diverse environments. Ideal for residential, commercial, and utility applications. The multi-specification version adapts to different application. Integrated circuits and reference designs help you create a smaller and faster optical module design used in high-bandwidth data communication applications. Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module.
