

What to do if the splitter shows as offline

Overview

Power-cycle the printer: turn it off, unplug for 30 seconds, plug it back in, turn it back on. Eight out of ten "offline" errors clear right here. While you're at it, restart your computer too — sometimes the print spooler service is the actual problem, not the printer. To fix this issue, follow the instructions in the article [Add or install a printer in Windows](#) instead of using the manufacturer's installer. An example ARM PC is Copilot+ PCs. To check if a. When a printer is showing as offline, it means it isn't currently connected to a computer, either through a cable or over a Wi-Fi network. In this article, we have a few methods to bring back the printer to online mode and solve the print issue Check whether your printer is turned on and. The printer might appear offline if there's a paper jam, low or missing ink, or a physical malfunction. " Locate your printer, right-click on it, and select "See what's. Nine times out of ten it means Windows or macOS lost track of the printer's IP address — usually after a router reboot, a Windows update, or the printer dozing into sleep mode.
