

Zhongyuan Internet Data Center

Overview

The facility, announced on Tuesday, will feature 10,000 of Alibaba's Zhenwu semiconductors which are designed for AI training and inferencing along with the ability to support AI models the size of hundreds of billions of parameters. China Telecom will own and operate the data. Provide 26 self-operated and managed data centers on 3 continents around the world, including Asia, Europe and America, and provide 7x24-hour service. China Telecom Global's data center business relies on China Telecom's multi-level data center system, high-quality network resources, and Data Centers in China - List of Colocation and Cloud data facilities in China. Get Quotes and find Specs, Photos, Videos etc. On December 15, Zhongyuan Great Data Center successfully obtained the Certificate of Data Center Site Infrastructure Certification issued by China Quality Certification Center (CQC) with the highest level of national standard enhancement (GB50174-2017 Level A), marking that the reliability and. But now, as part of China's ongoing efforts to liberalize its heavily regulated telecom services sector, the Chinese government has launched a long-awaited pilot program that started in late 2024 that lifts the foreign investment restrictions on internet data centers (the "Pilot Program"). In. China is preparing to pilot opening-up of internet data centers, an official from Ministry of Industry and Information Technology (MIIT) said on Friday, against the backdrop as China is boosting a high-level reform and opening-up.
